Patient of the Month

69 year old female- Bilateral Upper Lid Ptosis Repair
Here is what she had to say about her experience.

"As a result of the surgery Dr. McCracken performed on both of my eyelids, my visual acuity has significantly increased...I am once again able to complete needlepoint projects, and my eyelids appear "fully open" in family photographs. Dr. McCracken listened attentively to my concerns and honestly answered my questions. He is humble, kind, and sincere.

On the Friday evening following my surgery, I had a question. I followed the procedure I had been given regarding how to receive information when Dr. McCracken's office was closed. Amazing! Dr. McCracken answered his telephone and with utmost patience, and provided the information I needed.

The personnel I encountered at McCracken Eye & Face Institute demonstrated the (above) traits of Dr. McCracken."
