LEVEL OF SUN
PROTECTION IN A TONE-
ADAPTING, SILKY SMOOTH
COMPACT THAT PROVIDES
A HINT OF BLENDABLE
COLOR.

ENJOY 15% OFF SKINBETTER SUNSCREEN COMPACT DURING
THE MONTH OF JULY

WHAT IS UPPER EYELID SURGERY OR AN UPPER BLEPHAROPLASTY?

BLEPHAROPLASTY (GREEK: BLEPHARO + EYELID + PLASTY = TO CHANGE) IS ONE OF THE MOST COMMON COSMETIC PROCEDURES PERFORMED IN FACIAL PLASTIC SURGERY. OUR EYES ARE ONE OF THE FIRST AREAS THAT SHOW SIGNS OF AGING. AS WE AGE, WE DEVELOP EXCESS SKIN ON THE EYELIDS, WHICH UNFORTUNATELY MAKES US LOOK TIRED. AN UPPER BLEPHAROPLASTY IS A MANAGEABLE PROCEDURE THAT CAN HELP CORRECT THESE CHANGES AND HELP RESTORE A MORE YOUTHFUL AND RESTED APPEARANCE. MOST OFTEN THE RESULTS ARE SO NATURAL THAT FRIENDS WILL COMMENT HOW GREAT YOU LOOK WITHOUT REALIZING SURGERY WAS PERFORMED.

THE ART OF BLEPHAROPLASTY NEEDS TO BE CUSTOMIZED FOR EACH PATIENT INDIVIDUALLY. THIS IS WHY DR. MCCRACKEN WILL SYSTEMATICALLY SPEND AS MUCH TIME AS NEEDED DURING THE CONSULTATION TO CUSTOMIZE THE THOUGHTFUL TREATMENT PLAN FOR EACH PATIENT TO ACHIEVE A YOUTHFUL AND RESTORED OUTCOME.

IF YOU ARE CONSIDERING THIS PROCEDURE, WE ENCOURAGE YOU TO REACH OUT TO OUR PATIENT CARE COORDINATOR, RENEE TO SCHEDULE YOUR 90 MINUTRE CONSULTATION WITH DR. MCCRACKEN. AFTER A COMPREHENSIVE EVALUATION, DR. MCCRACKEN WILL DELIVER A CUSTOMIZED SURGICAL PROCEDURE FOR YOU!

LET'S TALK ABOUT "PREJUVINATION"

Skin prejuvenation is an innovative approach to maintaining youthful, healthy skin by addressing early signs of aging before they become more pronounced. The focus is on enhancing the skin's natural repair processes, promoting collagen production, and improving overall skin tone and texture. Combining various advanced skincare treatments designed to target fine lines, uneven pigmentation, and the loss of elasticity at an earlier stage. This helps to delay the visible signs of aging, keeping the skin looking fresh, vibrant, and rejuvenated longer. A few of our favorite treatments with this goal in mind are listed below.

WHAT IS A SURGICAL LIP LIFT ?

A surgical lip lift is a cosmetic procedure designed to enhance the appearance of the lips by shortening the distance between the upper lip and the nose, creating a fuller and more youthful look. This procedure is ideal for individuals looking to add volume to their lips and improve lip symmetry. By carefully lifting the upper lip, this procedure can reveal more of the natural lip tissue, resulting in a more defined and attractive smile. The procedure is typically performed under local anesthesia with minimal downtime, making it a popular choice for those seeking subtle, yet impactful, facial enhancement.

JUNE 2024

Staff Spotlight: Jen Spencer

Jen, our Front Desk Coordinator, is originally from Louisville, Kentucky and moved to the Denver area in 2002 with her husband. She is a proud mother of two amazing sons and a sweet rescue dog Bailey. Her background is in project management, and she was blessed to be a stay-at-home Mom while raising her sons. She loves traveling, watching sports & spending time with family.

Jen's Favorites:
SkinBetter Trio and Alto

Product of the Month: SkinBetter AlphaRet

ENJOY 15% OFF JUNE ONLY

AlphaRet is the latest innovation in retinoid renewal delivering remarkable results, with little-to-no irritation often experienced with retinols and other retinoid products.

- Significantly reduces the appearance of wrinkles in as little as four weeks, with little-to-no irritation.
- Provides moisture to help counteract dryness associated with traditional retinoid-based products.
- Combines two gold standard skin rejuvenation ingredients - a retinoid and an AHA (lactic acid) - joined together to create the revolutionary AlphaRet Technology that minimizes irritation, enhancing satisfaction and experience. A blend of antioxidants helps neutralize free radicals.

Don't forget your daily SPF this summer!

AGING AND YOUR HAIR

NUTRAFOL

NOW SOLD IN-OFFICE

HAIR GROWTH NUTRACEUTICALS
FORMULATED WITH
STANDARDIZED INGREDIENTS TO
ADDRESS MULTIPLE ROOT
CAUSES OF THINNING HAIR FOR
MEN AND WOMEN THROUGHOUT
LIFE STAGES AND CYCLES

Shedding and hair thinning are commonly experienced by both men and women as we age. Male-patterned hair loss typically takes place along the hairline and the crown. Women tend to experience loss and thinning along the hairline and down center "part". This can be bothersome to many and thankfully, there are a variety of interventions that can be taken! Speak with Dr. McCracken and the staff about the best treatment approach for you! Common treatments include: Nutrafol, PRP injections, prescription Minoxidil or Finasteride, FUE or FUT hair transplant. Results are often best with combined therapies.
